Alinhamento Semântico de Tópicos: SBBD x VLDB
Tópicos SBBD
Brazilian Symposium on Databases
Data Analytics for Brazilian Applications
Data Ecosystems and Economic Analysis
Data Management and Governance
Data Mining and Integrity Constraints Discovery
Data Models and Dataset Management
Data Quality and Entity Resolution
Data Schema and Evolution Analysis
Data Source Quality and Profiling
Database Applications in Medical and Scientific Data Analysis
Graph Processing and Database Performance Tuning
Graph-Based Data Organization and Management
Hardware-Aware Database Query Optimization
High-Dimensional Data Clustering Methods
Multimodal Image Retrieval and Data Processing
Ontology Alignment and Topic Modeling
Privacy-Preserving Data Management Systems
Public Transportation Data Management
RDF Data Storage and Query Processing
Scientific Workflow Data Processing Optimization
Semantic Data Classification and Integration
Sentiment Analysis and Data Mining
Similarity Join Algorithms and Data Integration
Social Coding Collaboration Analysis
Spatial and Geographic Data Management
Spatial-Textual Data Indexing
Temporal Sequences and Pattern Queries in Databases
Text Classification and Natural Language Processing
Time Series Forecasting for Brazilian Environmental Applications
Urban Traffic Anomaly Detection
Web Data Integration and Quality
Approximate Nearest Neighbor Search Algorithms
Approximate Similarity Search and Community Detection
Blockchain and Distributed Ledger Databases
Causal Inference from Observational Data
Cloud Database Systems and Clustering
Crowdsourcing Algorithms and Worker Selection
Data Analysis and Query Processing
Data Analytics and Recommendation Systems
Data Management and Processing Systems
Data Partitioning and Query Optimization
Data Quality and Anomaly Detection
Data Quality and Error Detection
Database Data Processing and Schema Management
Database Query Processing and Data Integration
Database Query Processing and Recommendation Systems
Database Schema Integration and Benchmarking
Dataset Management and Data Quality
Differential Privacy for Database Protection
Entity Resolution and Data Blocking
GPU-Accelerated Data Processing Systems
Graph Clustering and Network Analysis
Interactive Systems for Fraud Detection Rules
Machine Learning on Distributed Databases
Main-Memory Database Performance Optimization
Natural Language Querying of Databases
Privacy-Preserving Data Analysis Algorithms
Query Optimization and Processing Techniques
Query Optimization in Distributed Analytics
Road Network Data Analysis and Query Processing
Set Similarity Search and Matching
Shortest Path Algorithms on Networks
Social Network Influence and Maximization
Stream Processing Latency and Memory Management
Time Series Data Stream Analysis
Top-k Query Result Sampling and Summarization
